

TU central library gets solar power

KIRTIPUR (RSS): Solar power system of 22 kilowatts has been installed at the Tribhuvan University (TU) Central Library in Kirtipur.

Alternative Energy Promotion Center installed the solar plant at a cost of Rs 8.8 million.

After the power installation, the basic problems caused by the frequent power cuts would be resolved in the country's biggest library, librarian Janar-

dan Dhungana said.

The master plan to establish an e-library and a digital library would be materialized soon after the installation of the solar plant, it is believed.

Dhungana said different works at the library including building a wall, parking site, cafeteria, drinking water supply and others would be arranged with an investment of Rs 35 million within 2070/071.
