Baseline Study in Ankhekhola and Sanobheri Mini Hydro Catchment Area

1. Introduction

Renewable Energy for Rural Livelihood (RERL) programme funded by United Nations Development Programme/Global Environment Facility (UNDP/GEF) has been implementing from July 2014 under the execution of AEPC. This programme is developed as an integral part of AEPC/NRREP and thus assists in fulfilling its ambitious targets.

The main objective of RERL is to support AEPC/NRREP to remove barriers to increased utilization of renewable energy resources in rural Nepal in order to support economic, environmental, and social development of people in the rural areas and to reduce GHG emissions. RERL particularly supports for scaling up of less disseminated larger RETs such as mini hydro, large micro hydro (+60 kW) and large scale solar Photo Voltaic (PV). The core strategies of RERL include demonstration projects, private sector involvement for financing and attainment of financial sustainability through promotion of productive end-uses.

2. Background of assignment

AEPC/RERL has been providing technical support to ADB/SASEC for installation, operation and sustainable management of the mini hydro and large mini- grid project in Nepal. Before to install the mini hydro and large solar mini-grid project, basic information (socio-economics data) collection of the households in the catchment is mandatory. AEPC provides subsidy to the individual households under the subsidy policy and delivery mechanism for the construction of the project and rest of the equity has to be managed by local community. Therefore, it is necessary to collect number of households and basic information from catchment areas to calculate subsidy amount. Furthermore, it is prerequisite to create the benchmarks to establish a baseline data for each project indicators. These baseline data will be the guiding pillars to measure end –of the project impacts outcomes and outputs. The baseline survey will also help devise appropriate monitoring tool for project interventions. AEPC/RERL has already carried out detail feasibility study of two mini hydro project of Aankhe khola mini hydro project and Sanobheri mini hydro project in Dolpa and Rukum district for the construction of the mini hydro project.

Aankhe Khola Mini Hydro Project (AKMHP) is located in Thuli Bherimunicipality, Sangta ward no-11 of Dolpa district, Karnali Province. The project can reached 4 hours walking from district headquarter Dune. The project is developed by AankheKhola Electricity Cooperative Ltd formed by local people. The 500 kW capacity plant plans to electrify 3059 households of neighboring (1-11) wards of Thuli Bheri Municipality and Ward No. 1, 2, 3 and 7 of Tripurasundari Municipality. The excess energy will be supplied to Dolpa Bazar (District Headquarter). Similarly, Sanobheri mini hydro project is located in Takshera Rural Municipality in east Rukum which is registered in the name of Sahid Smirti Rural Electrification Project. The 998 kW capacity plant plans to electrify 3500 households in Takserha Rural Municipality and excess energy will be supplied to district headquarters of east Rukum.

3. Objective of the assignment

The main objective of the baseline study is to prepare baseline information of the beneficiary households and potential end uses. The specific objective of the baseline study are:

- a) To prepare base-line survey format
- b) To Identify the number of beneficiary households in the catchment areas
- c) To collect basic social and economic status of the local people
- d) To serve as a starting point of comparison for future final evaluations

4. Scope of work

The selected consulting firm is required to work independently but with the necessary support and coordination from AEPC/RERL. Mainly, but not limited to, the consultant should be committed on the following scope of work.

- a) Prepare base line survey format and get approval from RERL and SASEC
- b) Debrief/discuss with project team about effectiveness of questionnaire checklists and other tools used in pre-test collect feedback and finalize them
- c) Pre-test of agreed questionnaire in one mini hydro project site
- d) Lead overall field survey, data collection as per approved questionnaire and other tools in the catchment area of mini hydro projects
- e) Orient, train and supervise the enumerators. Each enumerators will practice survey data collection under the supervision of the team before the enumerators start the survey
- f) The consultant/supervisor ensure the quality of information collection from field, cross-check with the validity of information collected and verify/revise where needed
- g) Analyze data and prepare the report and submit to RERL

5. Deliverables

The following deliverables are envisioned under the ToR

- a) Base-line survey format
- b) Baseline survey report
- c) An e-copy of entered raw data

6. Time schedule

The duration of the assignment shall be for three months from the date of signing the contract agreement with the consultant firm.
